

018 Hoop Table Lamp Small

Design	John Tree
Material	Scots Pine
Country of production	Finland
Environment	Indoor use
Weight	0,5 kg
Manufacturer	Senkki – Nastola, Finland
Origin of Pine	EU

018 Hoop Table Lamp Small

Dimensions

Packaging

L: 0,4 m, W: 0,3 m, H: 0,1 m

Finish

Vaarnii's lighting products are made from a combination of solid pine wood and pine veneer, and finished with a stain-resistant, water-repellent, matte wood oil (we use Osmo Color hardwax-oil 3062 matt).

Dimmable function

No, but can be fitted with an aligned dimmer

Bulb base

E14

Light source

2,3W LED (included)

Colour temperature

3000K

Cable

Length	200 cm
Switch	Yes
Material	PVC coated Copper wire
Colour	Black

Lamp rating

Voltage	220-240V
Frequency	50/60Hz
IP Rating	20
Energy label	E
Protection class	IP 20
Plug	EU: Type F, CEE 7/4 US: Type A, NEMA 1-15 UK: Type G, BS 1363

018 Hoop Table Lamp Small

Bulb replacement	Remove the lamp shade before changing the bulb to reduce risk of damaging it. Use an E27 max 60W bulb. We recommend using a LED bulb with 3000K color temperature, as it works beautifully with pine veneer and lasts for many years. On top of this, LED bulbs consume a lot less energy than traditional halogen or incandescent light sources.
General cleaning	Pine veneer is a delicate material that requires careful handling. The inner side contains a reinforcing layer of cellulose fiber (paper). Gently remove any dust from the veneer using a feather duster.
Aging	Pine will naturally change colour as it ages. Your pale piece of lighting will gradually mature to a beautiful honey colour over the course of several years.
Sustainability	All Vaarnii products are made locally in Finland by a small number of expert Finnish manufacturers. The vast majority of the pine timber we use comes from sustainably managed Finnish forests. Currently, we source our high-quality pine veneer and pine ply wood from a carefully sourced producer in Poland. This is in order to ensure these materials meet a sustainable level of quality that cannot be found in Finland today. Vaarnii is actively working toward sourcing 100% of our pine material here in Finland, in line with our core values. We are hopeful that working in collaboration with the right partner we will realise that ambition.
Material	We have chosen to focus on a single material that is locally abundant. Our range is made entirely from Scots Pine, which is the most populous tree in Finland, making up approximately 44% of all forests. We have chosen the material based on opportunity and locality, not fashion.
Treatments	Our surface treatment materials include Osmo Color hardwax-oil 3062 matt and the adhesive Kiilto Pro B3, which is M1 certified, meaning they have very low emissions of volatile organic compounds (VOCs).

Packaging

We use recyclable cardboard and honeycomb to protect the products, keeping plastic use to an absolute minimum. All the packaging for our indoor furniture is made partly from recycled cardboard. Whenever possible, we reuse our packaging.

Production

All our suppliers comply with our Supplier Code of Conduct, which requires that the supplier has either an environmental management system certification, for example ISO 14001 certification, or reports on their environmental management in production to Vaarnii annually.
