

A
Tischplatte
table top

B
Beinpaar
pair of legs

C
Montage-Paddel
assembly paddle

Place table top A with its surface facing down onto the floor. Protect the surface with a blanket or similar.

Pull out both pairs of legs B and assembly paddle C from the sides of the table frame.

Vertically slide assembly paddle C between pair of legs B until it is positioned in the centre.

Take both ends of paddle C and turn by 90 degrees so that the pair of legs spreads apart. Push the pair of legs laterally into the frame of the table top and position as desired.

! The pointed ends grip under the frame. In order for the pair of legs to slide in more easily, it can be pushed under the frame in a slightly sloping position.

! To ensure that the table is stable, please make sure that the pairs of legs are positioned in a right angle to the table frame.

Nachdem das Beinpaar an der gewünschten Position sitzt, das Paddel C hochkant drehen und zwischen den Tischbeinen herausziehen.

Das zweite Beinpaar B wie beschrieben einsetzen.

Soll die Position der Beine verändert werden, das Paddel erneut einstecken, drehen und das Beinpaar in der Zarge verschieben.

! Soll der Standort des Tisches verändert werden, bitte den Tisch anheben, nicht schieben!
